CAR Stackers

Our clients can avail from us a vast assortment of Car parking Lift. All these lifts are manufactured using premium quality raw material and advanced techniques. Further, These Car parking Lift help In organizing parking floor of any building by utilizing the available space in the best possible manner. Moreover, the range offered by us requires very low maintenance owing to its precise designing and reliable services. Customers can avail these products in various specifications as per their requirements.

Two Car Parking System

- Saves Land area and take full use of the current space to raise the number of parking cars.
- The Structure is simple, united and easy for operation Suitable for Car Models-Sedan for all levels & SUV for only ground level.
- Adapted Places : Apartments, yards & lower height of basement, IT parks, Hotels. It can be used both indoor & outdoor.

Geared Traction Machine

- These machines are small, compact, light with great performance.
- It is designed for better performance for the application up to 2000 kg load, & speed from 0.32, 0.5, 0.6, 1m/s.
- These gears are designed for use in freight lifts in compliance with the directives and the regulation in Europe standards.
- All have worm of hardened ground steel.
- The crown is of centrifugally cast antifriction bronze.
- The break is equipped with independent jaws as well as a twin magnetic circuit and is available in various voltage.

Gearless Machine

- Permanent magnets synchronous motor with Brush-less technology.
- High load capacity, Silent & Jerk free ride.
- Comfort Safety, Energy Saving
- Maximum static load up to 2000kg & speed up to 1m/sec
- Manual rescue system

Overspeed Governor Unit

- Compact design & quite reliable for control the speed.
- Easy installation of Governor in the system.
- Operation even at adjusted tripping speed in both up & Down directions.
- Safety switch is provided for electrically control the speed of transaction machine.
- Test groove is provided for testing the governor at site.

Overload Device

- Digital Programming via keyboard.
- Relay, Communication or optional output signal.
- Signal handled by high speed operational amplifier.

MICROPROCESSOR HIGH TECHNOLOGY CONTROL PANEL

VVVF, ARD Microprocessor Control Panel

- Powered by 16 bit microcontroller providing complex functionality.
- Wall mounted compact, space saving design.
- Position & Direction indicator in control panel to monitor car movement.
- Fireman operation with programmable floor.
- Electrically isolated power supply.
- Single design supports Auto Door/Manual Door/V3F/Normal/Hydraulic Lifts Supports up to 32 floors.
- Cycle counting & GPRS system.

Automatic Rescue Device (ARD)

- 16 bit micro-controller based single board design.
- Pure Sine wave output fully digital settings.
- Trimpot less LCD gives complete insight of the various parameters user friendly messages on the display.
- Door Operator - Any power operated doors or manual entrances.
- It can Helps to Travel if men electrical supply failure.

Variable Frequency AC Drive

- Smooth Start & stop.
- Leveling Accuracy.
- Save energy & therefore reduces energy costs.
- Stable & reliable performance.
- Used to control AC motor speed & torque
- by varying motor input frequency & Voltage.

Control Logic

- Down Collective
- Full Collective
- Simplex / Duplex
- Triplex / Quadraplex
